EnerTech Environmental Named to GoingGreen Top 100 for the Second Straight Year

ATLANTA, GEORGIA (September 22, 2008) – EnerTech Environmental, Inc. (EnerTech), a renewable energy company dedicated to providing clean energy technologies for recycling biosolids (sewage sludge) to energy, announced today that it was selected by AlwaysOn Network for the 2008 GoingGreen Top 100. This is the second straight year that EnerTech has received this honor.

The GoingGreen 100 Companies are chosen for their contributions to accelerating the global movement for a more sustainable environment through innovation, market traction, and game-changing approaches to clean tech.

“This is a great year for EnerTech,” said Kevin Bolin, EnerTech CEO. “As we move forward with finalizing construction for our first commercial biosolids-to-renewable energy facility, it feels great to be recognized by AlwaysOn as an innovator in green tech for the second year in a row. The GoingGreen 100 is a list of remarkable and cutting-edge companies. We’re excited to be acknowledged alongside other pioneers in clean and sustainable business.”

The second-annual elite GoingGreen 100 list was compiled by the AlwaysOn editorial panel. Companies on the list had to be peer-nominated, with AlwaysOn receiving more than 500 nominations from investors, investment bankers, and other industry experts. EnerTech was nominated in the category of Resource Recovery and Waste Management.

About AlwaysOn Network

The AlwaysOn Network (www.alwayson.goingon.com) is transforming the media business by providing its readers with an open and participatory editorial environment. Borrowing from the underground blogging and social networking traditions, AO was launched in 2003 and is recognized as a leading innovator in the “open media” revolution. The network’s editors focus on the sweet spots in high-growth markets where technology innovation is disrupting behavior and creating new entrepreneurial opportunities for both big businesses and start-ups. AO’s audience is comprised of a mix of business development officers, media buyers, venture capital and private-equity investors, and leading members of the press and blogging community.

About EnerTech Environmental

EnerTech Environmental, Inc. is a renewable energy company dedicated to the protection of public health and the environment. The company provides answers to the problems of traditional waste management methods and simultaneously creates renewable energy – in a way that makes economic sense. EnerTech’s patented SlurryCarb™ process cleanly and economically converts biosolids (sewage sludge) into a high-grade, renewable fuel, with significant cost savings over alternative methods. EnerTech’s corporate headquarters are located in Atlanta, Georgia.
