EnerTech Environmental Names New President and COO

ATLANTA, GEORGIA (May 29, 2008) – EnerTech Environmental, Inc. announced today that John Prunkl has joined the company as President and Chief Operating Officer. In this position Mr. Prunkl will provide the leadership and vision to grow EnerTech into a global leader in the renewable energy and waste management industries.

Mr. Prunkl will oversee the execution of EnerTech's first commercial SlurryCarb™ facility in Rialto, California and focus on developing multiple SlurryCarb™ projects throughout the United States and globally. EnerTech's unique SlurryCarb™ process economically produces a renewable fuel, called E-Fuel, from biosolids and other high-moisture wastes. The Rialto facility is scheduled to be fully operational in early 2009. E-Fuel produced from the facility will displace coal usage in Southern California with a renewable, carbon-neutral, energy source.

“Bringing John on board marks a new milestone in the growth of this company,” said Kevin Bolin, EnerTech CEO. “His expertise in growing companies in the renewable energy space will assist EnerTech in becoming a global leader in the management and conversion of biosolids and other waste streams into environmentally sustainable, carbon-neutral energy products. We are excited that he has chosen to join our team.”

Mr. Prunkl comes to EnerTech with over 20 years of experience in the energy sector. Prior to joining EnerTech, Mr. Prunkl was president of EPCOR USA and Primary Energy Recycling Corporation, a leader in energy recycling with over \$1B in total assets. There he and the senior management team grew the company from zero revenues to over \$80 million in EBITDA in its first 3 years, successfully completed the company's initial public offering on the Toronto Stock Exchange (TSX) in 2005 and privately sold the clean heat and power business to EPCOR Power LP in 2006. Previous to Primary Energy, Mr. Prunkl was co-founder of MetroGen LLC, Vice President of Global Operations for Illinova Generating, and held several international management positions with GE Power Systems. Mr. Prunkl holds a Bachelor of Arts in Mathematics from Huntingdon College, a Bachelor of Science in Mechanical Engineering from Auburn University, and a Master of Business Administration from the J.L. Kellogg School of Management at Northwestern University.

About EnerTech Environmental

EnerTech Environmental, Inc. is a renewable energy company dedicated to the protection of public health and the environment. The company provides answers to the problems of traditional waste management methods and simultaneously creates renewable energy—in a way that makes economic sense. EnerTech's patented SlurryCarb™ process cleanly and economically converts biosolids (sewage sludge) and other high moisture wastes into a high-grade, renewable fuel, with significant cost savings over alternative methods. EnerTech's corporate headquarters are located in Atlanta, Georgia.
