HDR Teams with EnerTech to Build the Rialto SlurryCarb™ Facility

ATLANTA (July 12, 2006) – EnerTech Environmental, Inc. announced today that it has signed a contract with HDR Design-Build, Inc., the design-build operating company of architectural and engineering firm HDR, to provide engineering, procurement and construction services for its upcoming SlurryCarb™ facility in Rialto, California. Initial site preparation for the Rialto facility is currently underway and full construction is scheduled to begin this summer.

HDR has worked closely with EnerTech on the design of the Rialto facility, which will receive biosolids from municipalities in the Los Angeles region and produce approximately 140 tons per day of renewable fuel. “EnerTech’s emerging SlurryCarb™ process represents a significant technological advancement in biosolids processing, and we are excited to partner with EnerTech to build the first commercial-scale facility in Rialto,” said Doug Lisak, president and COO of HDR Design-Build, Inc.

EnerTech’s SlurryCarb™ process economically produces a renewable fuel from biosolids and other high-moisture wastes. The Rialto SlurryCarb™ facility is scheduled to commence operations in early 2008. “HDR has extensive experience with design-build projects in both water and wastewater nationwide. The experience HDR brings to our Rialto project team will ensure a successful construction and startup cycle, and guarantee the ultimate success of the facility,” said EnerTech president Kevin Bolin.

About HDR

HDR (hdrinc.com) is an employee-owned architectural, engineering and consulting firm that excels at managing complex projects and solving challenges for clients. More than 5,000 professionals, including architects, engineers, consultants, scientists, planners and construction managers, in more than 130 locations worldwide, pool their strengths to provide solutions beyond the scope of traditional A/E/C firms. HDR is No. 17 in the Engineering-News Record Top 500 Design Firms rankings for 2006, and No. 13 in wastewater treatment.

About EnerTech Environmental

EnerTech Environmental, Inc. is a renewable energy company dedicated to the protection of public health and the environment. The company provides answers to the problems of traditional waste management methods and simultaneously creates renewable energy – in a way that makes economic sense. EnerTech’s patented SlurryCarb™ process cleanly and economically converts biosolids (sewage sludge) and other high moisture wastes into a high-grade, renewable fuel, with significant cost savings over alternative methods. EnerTech’s corporate headquarters are located in Atlanta, Georgia.
