EnerTech Environmental Appoints Vice President of Eastern Projects

ATLANTA, GEORGIA (June 16, 2006) – EnerTech Environmental, Inc., announced today that Don Brindley has joined the company as Vice President of Eastern Projects. In this position, Mr. Brindley will work with EnerTech’s project development team to build SlurryCarb™ facilities in the eastern United States.

“The marketplace has shown increasing interest in our SlurryCarb™ technology and the advantages it provides as an economically and environmentally sound biosolids management solution,” said EnerTech President Kevin Bolin. “Don will play a pivotal role in our efforts to develop SlurryCarb™ projects to meet the needs of our customers on the east coast.”

EnerTech’s unique SlurryCarb™ process economically produces a renewable fuel from biosolids and other high-moisture wastes. The company’s first commercial SlurryCarb™ facility, located in Rialto, California, is scheduled to begin operations in early 2008.

Mr. Brindley brings extensive business development experience and a demonstrated success in the water and wastewater industry to his role at EnerTech. Prior to joining EnerTech, Mr. Brindley was responsible for the development and execution of a successful sales and marketing campaign for a new oil purification technology at ISOPur Fluid Technologies. Prior to ISOPur, Mr. Brindley served as Vice President of Strategic Accounts at U.S. Filter Corporation where he was responsible for cultivating and maintaining productive alliances with strategic customers. In this role he managed over \$15 million per year of service business and a contract portfolio in excess of \$100 million.

Mr. Brindley is a life-long resident of the Philadelphia area and holds a Bachelor of Science degree in Chemical Engineering from Drexel University in Philadelphia.

About EnerTech Environmental

EnerTech Environmental, Inc., is a renewable energy company dedicated to the protection of public health and the environment. The company provides answers to the problems of traditional waste management methods and simultaneously creates renewable energy – in a way that makes economic sense. EnerTech’s patented SlurryCarb™ process cleanly and economically converts biosolids (sewage sludge) and other high moisture wastes into a high-grade, renewable fuel, with significant cost savings over alternative methods. EnerTech’s corporate headquarters are located in Atlanta, Georgia.
